Unit I: Reproduction (Unit VI)

- **Sexual Reproduction in Flowering Plants:** Pollen-pistil interaction, Double Fertilization, and Apomixis.
- **Human Reproduction:** Gametogenesis, Menstrual Cycle, Fertilization, and Implantation.
- **Reproductive Health:** Birth control methods, MTP, and ART (IVF, ZIFT, GIFT).

Unit II: Genetics and Evolution (Unit VII)

- **Inheritance:** Mendel's Laws, Incomplete Dominance, and Chromosomal Disorders.
- **Molecular Basis:** DNA structure, Transcription, Translation, and Lac Operon.
- **Evolution:** Homologous organs, Adaptive Radiation, and Hardy-Weinberg Principle.

Unit III: Biology in Human Welfare (Unit VIII)

- **Health:** Life cycles of Plasmodium and HIV, Immunity, and Cancer.
- **Microbes:** Sewage treatment, Biogas production, and Biocontrol agents.

Unit IV: Biotechnology (Unit IX)

- **Principles:** Restriction enzymes, Gel Electrophoresis, and PCR.
- **Applications:** Bt-Cotton, RNA interference, and Gene Therapy.

Unit V: Ecology and Environment (Unit X)

- **Populations:** Growth curves and Biotic interactions (Mutualism, Parasitism).
- **Ecosystem:** Productivity, Energy flow, and Nutrient cycling.
- **Biodiversity:** The Evil Quartet and Conservation (In-situ/Ex-situ).
